**Panarmenian Network State
as a part of global network
state movement**

Network State & New Countries

Panarmenian Network State presents series of webinars, designed to explore the futuristic world of network states. These sessions bring together thought leaders, experts, and enthusiasts from around the globe to discuss the latest developments, challenges, and opportunities in this innovative field.

»»» Introduction

The Panarmenian Network State launched its 2024 series of webinars with an introductory session on January 29th, featuring insights on the politics, financial strategies, and ideological foundations of network states, attracting a diverse audience of experts, diplomats, and enthusiasts.

Building Network States

Atoms Edition

Brussels, Belgium

July 8

Vahram Ayvazyan, Panarmenian Network State founder and board chairman, participated in EthCC 2024, Europe's largest annual Ethereum event focused on technology and community. Held in Brussels, EthCC featured conferences, workshops, and networking opportunities, emphasizing knowledge-sharing and community engagement in blockchain technology.

The Network State Conference

Sep 22 • Singapore

Vahram Ayvazyan, Founder and Board Chairman of the Panarmenian Network State, actively participated in The Network State Conference, focusing on founding, funding, and fostering new communities. During the event, Vahram engaged in insightful discussions with participants, sharing his expertise and vision for innovative societal frameworks. He collaborated with Loci's team, contributing to dynamic interviews on shaping the future of network states and building resilient communities.
